

System40

INTEGRATED MODULAR DESKING SOLUTIONS

Modtec made, System40 is an integrated modular desking system for the modern office work environment.

A slimline 40mm profile desking system with knockdown modular frames was developed for the changing fast paced environments we all work in, be it home, office, medical, we need a system that can grow with us.

The strengths of System40 are discretely integrated so not to over shadow the simplistic profile, unlike other bulky inflexible systems.

With the capability of being able to take almost any of today's working surfaces, the system will fit into even the most discerning users office or home.

SYSTEM 40 FEATURES INCLUDE:

- Slim 40x40mm profile to provide minimal impact on surroundings
- System 40 modularity providing for flexibility and expandability
- Heat tempered Aluminium extrusion for strength
- Strong Zinc diecast fittings for positive adjustment and solid locking
- Durable powder coat finish which will look great even after years of service
- Height adjustable legs to ensure the working surface is level and comfortable
- Caster wheel options available to provide mobility for "tables on the go..."
- Flat pack to minimise freight charges
- Quick assembly time to keep installation costs down
- Only one tool required for frame assembly
